

I listen to XM for 1 reason. I like it. There is not any good radio stations around here and XM provides this. I am willing to buy the service. It should have the right to buy instant traffic and weather.

Don't take that right away from me.

XM should be able to cater to individual Metropolitan area users of their services. What they provide is a service. A service that many of us are willing to pay for.

The traffic and weather stations are a benifit to me as an over the road truck driver, and finding a local station is difficult at best to provide me with the detailed traffic reports 24/7, thus allowing me to avoid and not add more traffic congestion that hampers local law enforcement's ability to correct these types of situations.

I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide this kind of programming.
